

Fieldbus System

(Output device for driving 5-port solenoid valves)

Space-saving installation

Compact
Approx.
28 mm

Actual size

- **IP67**
* For units with a D-sub connector, and when connected to S0700 manifolds, it is IP40.
- **Drives up to 32 solenoids**
- **Daisy-chain wiring communication**
* Excludes the units compatible with IO-Link

<Compatible Protocols>

Made to Order

Please contact SMC for details on compatible products.

New **IO-Link** compatible products have been added.

- Can be connected using a single cable
- Various types of diagnostic tests can be performed using service data.

Diagnostic contents	Internal failure of the SI unit	Output short circuit	Output open circuit
	Solenoid valve power supply failure	Abnormal internal temperature of the SI unit	Output switching count value exceeded

EX260 Series

SMC
CAT.E02-25C

Manifold length reduced by approx. 53 mm

Wiring and piping from the same direction is possible. (for side ported)

Daisy-chain wiring communication is possible.*1

A branch connector is not necessary/Reduced wiring space

*1 Excludes the units compatible with IO-Link

An external terminating resistor is not necessary.

(Only available for M12 PROFIBUS DP, CC-Link communication connectors)

ON/OFF switching is possible with an internal terminating resistor.
An external terminating resistor is not necessary.

	C [dm ³ /(s·bar)]	b				
 IP67 *1	SY3000	1.6	0.19	0.35 (Standard) 0.1 (With power-saving circuit)	ø50	
	SY5000	3.6	0.17		32	ø63
	SY7000	5.9	0.20			ø80
 IP67 *1, *3	JSY1000	0.91	0.48	0.2 (With power-saving circuit) 0.4 (Standard) 0.1 (With power-saving circuit)	ø40	
	JSY3000	2.77	0.27		32	ø50
	JSY5000	6.59	0.22			ø80
 IP40	S0700 *2	0.37	0.39	0.35	ø25	
 IP67 *1	SV1000 *2	1.1	0.35	0.6	ø40	
	SV2000 *2	2.4	0.18		32	ø63
	SV3000 *2	4.3	0.21			ø80
 IP67 *1	VQC1000	1.0	0.30	0.4 (Standard) 0.95 (Standard) 0.4 (Low-wattage type)	ø40	
	VQC2000	3.2	0.30		24	ø63
	VQC4000	7.3	0.38			ø160
	VQC5000	17	0.31		ø180	

*1 Units with a D-sub communication connector are IP40.

*2 There is no manifold part number setting for the IO-Link compatible units.

*3 IP40 for the JSY1000

New IO-Link compatible

Integratable with various existing networks

IO-Link devices can be easily connected to various networks via the IO-Link master, which acts as a gateway between IO-Link communication and various Fieldbuses.

Solenoid valves can be connected for communication without relying upon a Fieldbus or PLC.

Can be connected using a single general-purpose cable, resulting in a reduction in the space required for wiring

Port class B
IO-Link master (Commercially available)

- Connect the IO-Link master port to the device using a 1:1 configuration.
- Connect using an M12 round connector.
- Maximum cable length: 20 m
- Special communication cables are not necessary.
- In order to connect the SI unit using a single cable, use a port class B type IO-Link master.

Port class A
IO-Link master (Commercially available)

General-purpose 5-wire unshielded cables are used for connection. The signal wire and valve power supply wire can be connected with the same cable.

Port class B compliant

SI unit/Connector pin arrangement

Pin no.	SI unit port pin function (Port class B)
1	+24 V for control unit
2	+24 V for solenoid valve
3	0 V for control unit
4	IO-Link communication
5	0 V for solenoid valve

Difference between IO-Link master port class A and class B

Pin no.	IO-Link master port pin function	
	Port class A	Port class B
1	+24 V	+24 V
2	NC/DI/DO	Additional power supply +24 V
3	0 V	0 V
4	IO-Link/DI/DO	IO-Link/DI/DO
5	NC	Additional power supply 0 V

Y Branch Connector

Port class A compliant
A special wiring Y branch connector is available.

Used when connecting to a port class A type IO-Link master, which is often used when connecting to an IO-Link sensor

New IO-Link compatible

Features an impressive self-diagnosis function

Self-diagnosis contents

Diagnostic contents	Event category
Internal failure of the SI unit	Error
Output short circuit	Error
Output open circuit	Error
Solenoid valve power supply failure	Warning
Abnormal internal temperature of the SI unit	Warning
Output switching count value exceeded	Notification

Real-time diagnosis (Process data)

- Any event information detected by the SI unit using the process data as the diagnostic input can be transmitted to the PLC and PC in real time via the master Fieldbus.
- 3 types of event flags are transmitted to the PLC. (Error/Warning/Notification)

Request base diagnosis (Service data)

- Regarding detailed diagnostic information, the event codes can be transmitted as service data to the PLC and PC.

IO-Link master
(Commercially available)

Equipped with a solenoid valve output operation count function

The number of valve operation instructions is counted for each output of the solenoid valve.

Set the count threshold value to be used as a guide for maintenance according to the operating conditions of the cylinder connected to the solenoid valve.

Once the threshold value is reached, notification of this fact will take place automatically.

This enables periodic maintenance to be performed before any unexpected cylinder failures occur.

IO-Link master
(Commercially available)

Notification of the fact that the count threshold has been exceeded

Currently at 10 million operations

Currently at 5 million operations

Fieldbus System For Output

EX260 Series

Compact design	Compact design for space saving
Number of outputs	32/16 digital output type available for each unit in the series (IO-Link is only compatible with the 32-point digital output type.)
Output polarity	Negative common (PNP)/positive common (NPN) type available for each unit in the series (Only negative common (PNP) is available for units compatible with Ethernet POWERLINK and IO-Link.)
Enclosure	IP67 (For units with a D-sub connector, and when connected with S0700 manifolds, it is IP40.)
Internal terminating resistor	ON/OFF switching is possible with an internal terminating resistor for communication. (Only for units compatible with M12 PROFIBUS DP, CC-Link communication connectors)

Specifications

All SI Units Common Specifications

Power supply for control	Power supply voltage	21.6 to 26.4 VDC*1
	Internal current consumption	100 mA or less
Power supply for output	Power supply voltage	22.8 to 26.4 VDC
Environmental resistance	Enclosure	IP67*2
	Operating temperature range	-10 to +50°C
	Operating humidity range	35 to 85%RH (No condensation)
	Withstand voltage	500 VAC for 1 minute between terminals and housing
	Insulation resistance	10 MΩ or more (500 VDC measured via megohmmeter) between terminals and housing
Standards		CE marking (EMC directive/RoHS directive), UL (CSA) compliant
Weight		200 g
Accessories	Mounting screw	2 pcs.
	Seal cap (for M12 connector socket)	EX9-AWTS (1 pc.)*3

*1 To serve as the power supply for communication, the power supply voltages are 11 to 25 VDC for the EX260-SDN□ and 18 to 30 VDC for the EX260-SIL1.

*2 IP40 applies to EX260-SPR5/6/7/8.

*3 Not provided for EX260-SPR5/6/7/8

Min. bending radius (Fixed)	21.7 mm

⑤ Seal Cap (10 pcs.)

Use this on ports that are not being used for communication connector (M12 connector socket).
Use of this seal cap maintains the integrity of the IP67 enclosure.

* Tighten the seal cap with the prescribed tightening torque. (For M12: 0.1 N·m)

EX9-AW TS

● Connector specification

TS	For M12 connector socket (10 pcs.)
----	------------------------------------

For M12 connector socket

- Output devices other than valve manifold can be operated.
- By using the power block and output block for high watt load, operation up to 0.5 A/point can be performed.
- Possible to mount the output block and power block additionally between the SI unit and the solenoid valve (The surplus I/O points are used).
- 2 point outputs per output block (M12 connector)

You are requested to connect it to an SI unit and a valve manifold. For detailed specifications, refer to the operation manual that can be downloaded from SMC website, <https://www.smcworld.com>

6 Output Block

EX9-OE T 1

● Output specification

1	Source/PNP (Negative common)
2	Sink/NPN (Positive common)

● Power supply type

T	Internal power supply method (for low-wattage load)
P	Integrated power supply method (for high-wattage load) *1

*1 Required to connect with a power block

Dimensions/Parts Description

Specifications

Model	EX9-OET1	EX9-OET2	EX9-OEP1	EX9-OEP2
Internal current consumption	40 mA or less			
Output	Output type	Source/PNP (Negative common)	Sink/NPN (Positive common)	Source/PNP (Negative common) / Sink/NPN (Positive common)
	Number of outputs	2 outputs		
	Power supply method	Internal power supply method		Integrated power supply method (Power block: supplied from EX9-PE1)
	Output device supply voltage	24 VDC		
	Output device supply current	Max. 42 mA/point (1.0 W/point)		Max. 0.5 A/point (12 W/point)
Environmental resistance	Enclosure	IP67		
	Operating temperature range	-10 to 50°C		
	Operating humidity range	35 to 85%RH (No condensation)		
Standards	CE marking (EMC directive/RoHS directive), UL (CSA)			
Weight	120 g			

7 Power Block

EX9-PE1

Dimensions/Parts Description

Specifications

Model	EX9-PE1	
Connection block	Output block for high wattage load	
Connection block stations	Output block: Max. 8 stations	
Power supply for output and internal control	Power supply voltage	22.8 to 26.4 VDC
	Internal current consumption	20 mA or less
Supply current	Max. 3.1 A*1	
Environmental resistance	Enclosure	IP67
	Operating temperature range	-10 to 50°C
	Operating humidity range	35 to 85%RH (No condensation)
Standards	CE marking (EMC directive/RoHS directive), UL (CSA)	
Weight	120 g	
Enclosed parts	Seal cap (for M12 connector) 1 pc.	

*1 When using with 3.0 to 3.1 A, the ambient temperature should not exceed 40°C, and do not bundle the cable.

EX260 Series

8 Connector for Output Block Wiring

Field-wireable connector for connecting an output device to an output block

PCA-1557743

A-coded

Plug pin arrangement

Connections

- *1 When used for EX9-OE□1
- *2 When used for EX9-OE□2

Applicable Cable

Item	Specifications
Cable O.D.	3.5 to 6.0 mm
Wire gauge (Stranded wire cross section)	0.14 to 0.34 mm ² /AWG26 to 22
Core wire diameter (Including insulating material)	0.7 to 1.3 mm

PCA-1557756

A-coded

Plug pin arrangement

Connections

- *1 When used for EX9-OE□1
- *2 When used for EX9-OE□2

Applicable Cable

Item	Specifications
Cable O.D.	4.0 to 8.0 mm
Wire gauge (Stranded wire cross section)	0.34 to 0.75 mm ² /AWG22 to 18
Core wire diameter (Including insulating material)	1.3 to 2.5 mm

Refer to page 19 for the power supply cable for power block.

9 End Plate

Use when an output block is being used and a valve manifold is not connected.

EX9-EA03

<Example of use>

10 Bracket Plate/DIN Rail Mounting Bracket

A reinforcing brace used to mount an output block or power block onto an SI unit. To prevent connection failure between products due to deflection, use this bracket plate whenever an output block or power block is mounted.

EX9-BP1

EX9-BD1 (For VQC, S0700, SV)

Accessory

Accessory

EX260 Series Made to Order

Please contact SMC for detailed specifications and lead times.

SI Unit

Prepare the SI unit and valve manifold (without SI unit) separately, and combine them before use.

EtherNet/IP™ Web server function compatible

EX260-SEN1-X194

- Web server compatible: Can conduct a solenoid valve operation test (ON/OFF), check communication state, set QuickConnect™, etc.
- Applicable to the power supply taken from Rockwell Automation's safe output module with pulse test function
- Compliant with QuickConnect™ class A specifications
- The gateway address is set to 192.168.□.001 when the IP address is set by the rotary switch.
- Dimensions are the same as those of the standard type.

EX260 Series

Specific Product Precautions

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For fieldbus system precautions, refer to the “Handling Precautions for SMC Products” and the “Operation Manual” on the SMC website: <https://www.smcworld.com>

Wiring

Caution

1. **Select connectors that are $\phi 16$ or less if mounting valve manifolds directly using field-wireable connectors for SI unit power supply wiring.**

Using large diameter connectors causes interference with the mounting surface.

The following cables with connectors are recommended.

■ **For EX260-SPR□/SDN□/SEC□/SPN□/SEN□/SPL□**

<Cable with connector>

- EX500-AP□□□-□
- PCA-1401804/-1401805/-1401806

■ **For EX260-SMJ□**

<Cable with connector>

- EX9-AC□□□-1
- PCA-1401807/-1401808/-1401809

Operating Environment

Caution

1. **Select the proper type of enclosure according to the operating environment.**

IP67 is achieved when the following conditions are met.

- 1) Provide appropriate wiring between all units using electrical wiring cables, communication connectors and cables with M12 connectors.
- 2) Appropriately mount each unit and valve manifold.
- 3) Be sure to mount a seal cap on any unused connectors.

If using in an environment that is exposed to water splashes, please take measures such as using a cover.

When the enclosure is IP40, do not use in an operating environment or atmosphere where it may come in contact with corrosive gas, chemical agents, seawater, water, or water vapor.

When connected to the EX260-SPR5/6/7/8, manifold enclosure is IP40.

Adjustment / Operation

Caution

1. **For details on programming and address setting, refer to the manual from the PLC manufacturer.**

The content of programming related to protocol is designed by the manufacturer of the PLC used.

2. **For the EX260-SPN□, the side of the SI unit may become hot.**

It may cause burns.

Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of “**Caution**,” “**Warning**” or “**Danger**.” They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)*1), and other safety regulations.

 **Caution:** **Caution** indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.

 **Warning:** **Warning** indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

 **Danger :** **Danger** indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

*1) ISO 4414: Pneumatic fluid power – General rules relating to systems.
ISO 4413: Hydraulic fluid power – General rules relating to systems.
IEC 60204-1: Safety of machinery – Electrical equipment of machines.
(Part 1: General requirements)
ISO 10218-1: Manipulating industrial robots – Safety.
etc.

Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

3. Do not service or attempt to remove product and machinery/equipment until safety is confirmed.

1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

4. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.

1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalog.
3. An application which could have negative effects on people, property, or animals requiring special safety analysis.
4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

Caution

1. The product is provided for use in manufacturing industries.

The product herein described is basically provided for peaceful use in manufacturing industries.
If considering using the product in other industries, consult SMC beforehand and exchange specifications or a contract if necessary.
If anything is unclear, contact your nearest sales branch.

Limited warranty and Disclaimer/ Compliance Requirements

The product used is subject to the following “Limited warranty and Disclaimer” and “Compliance Requirements”.

Read and accept them before using the product.

Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first.*2)
Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided.
This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalog for the particular products.

*2) Vacuum pads are excluded from this 1 year warranty.

A vacuum pad is a consumable part, so it is warranted for a year after it is delivered.
Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

Caution

SMC products are not intended for use as instruments for legal metrology.

Measurement instruments that SMC manufactures or sells have not been qualified by type approval tests relevant to the metrology (measurement) laws of each country. Therefore, SMC products cannot be used for business or certification ordained by the metrology (measurement) laws of each country.

Revision History

Edition B	* EtherNet/IP™ has been added to applicable Fieldbus protocols.	QS
Edition C	* The IO-Link compatible EX260-SIL1 has been added. * Accessories and made-to-order specifications have been added. * “How to Order Manifold” and “Dimensions” pages have been deleted. * Number of pages has been decreased from 52 to 28.	XU

Safety Instructions

Be sure to read the “Handling Precautions for SMC Products” (M-E03-3) and “Operation Manual” before use.
