

Refrigerated Air Dryer

IDFB□E Series

For use in North, Central & South America

Protect Pneumatic Equipment from Moisture!

An air dryer removes the vapor from the moist compressed air delivered by the compressor, and prevents it from causing the pneumatic equipment to fail.

Effects of moisture on equipment

Malfunctoning of valves and actuators caused by dripping grease

Decomposition of auto drain caused by rusting inside pipes

Generation of water droplets

Refrigerant **R134a(HFC), R407C(HFC)**
Coefficient of destruction for ozone is zero.

Improved corrosion resistance with the use of stainless steel, plate type heat exchanger (IDFB4E to 75E)

UL certified product

Power supply voltage:

Single-phase
115 VAC (60 Hz)
230 VAC (60 Hz)
Three-phase
460 VAC (60 Hz)

Series	Rated inlet condition	Air flow capacity SCFM (m ³ /h [ANR])			Port size
		37°F(2.8°C)	45°F(7.2°C)	50°F(10°C)	
IDFB3E	100°F (37.8°C) 100psi (0.7MPa)	10(17)	11(19)	12(20)	NPT3/8
IDFB4E		15(25)	16(27)	17(28)	NPT1/2

2. Options

Optional specifications	Applicable model	Model (Suffix: Option symbol)
Cool compressed air output	IDFB3E to 11E	IDFB□E-11-A
For medium air pressure (up to 240 psi (1.6 MPa)) (Auto drain bowl: Metal bowl with level gauge)	IDFB6E to 37E	IDFB□E-□-K
With heavy duty auto drain (Suitable for medium air pressure)	IDFB55E, 75E	IDFB□E-46-L
With circuit breaker	IDFB4E to 75E	IDFB□E-□-R
Power supply terminal block connection	IDFB3E to 22E	IDFB□E-11-S
With terminal block for power supply, run & alarm signal and remote operation	IDFB4E to 75E	IDFB□E-□-T
Timer type solenoid valve with auto drain (Suitable for medium air pressure)	IDFB4E to 75E	IDFB□E-□-V

3. Accessory (Option)

Description	Page
Dust-protecting filter set	P. 119

IDFB□E Series

Model Selection

The corrected air flow capacity, which considers the user's operating conditions, is required for selecting the air dryer. Please select using the following procedures.

1 Read the correction factor.

Obtain the correction factor A to D suitable for your operating condition using the table below.

IDFB□E Selection Example

Condition	Data symbol	Correction factor ^(Note)	
Inlet air temperature	110°F (43°C)	A	0.82
Ambient temperature	105°F (40.5°C)	B	0.98
Inlet air pressure	75 psi (0.53 MPa)	C	0.95
Air consumption	14 SCFM	—	—

(Note) Values obtained from the table below.

2 Calculate the corrected air flow capacity.

Obtain the corrected air flow capacity from the following formula.
Corrected air flow capacity = Air consumption ÷ (Correction factor A x B x C)

$$\text{Corrected air flow capacity} = 14 \text{ SCFM} \div (0.82 \times 0.98 \times 0.95) = 18 \text{ SCFM}$$

3 Select the model.

Select the model which air flow capacity exceeds the corrected air flow capacity using the specification table. (For air flow capacity, refer to the data D below.)

According to the corrected air flow capacity of 18 SCFM, the **IDFB6E** will be selected because its air flow capacity at 60 Hz is 25 SCFM.

4 Option

Refer to pages 117, 118.

5 Finalize the model number.

Refer to pages 110, 114.

6 Select accessories sold separately.

Refer to page 119.

Data A: Inlet Air Temperature

Inlet air temperature		Correction factor	
°F	°C	IDFB3E to 37E	IDFB55E, 75E
90	32	1.31	1.08
100	37.8	1.00	1.00
110	43	0.82	0.83
122	50	0.66	0.46

Data B: Ambient Temperature

Ambient temperature		Correction factor
°F	°C	
77	25	1.24
90	32	1.09
95	35	1.04
100	37.8	1.00
104	40	0.98

Data C: Inlet Air Pressure

Inlet air pressure		Correction factor
psi	MPa	
75	0.53	0.95
100	0.70	1.00
110	0.76	1.04
120	0.83	1.07
125	0.86	1.09
150	1.03	1.13
175	1.21	1.18
200	1.38	1.22
232	1.60	1.24

Data D: Air Flow Capacity

Model	Air flow capacity SCFM (m³/h (ANR))										
	IDFB3E	IDFB4E	IDFB6E	IDFB8E	IDFB11E	IDFB15E	IDFB22E	IDFB37E	IDFB55E	IDFB75E	
Outlet air pressure dew point	37°F (2.8°C)	10 (17)	15 (25)	25 (43)	41 (70)	59 (100)	71 (120)	107 (182)	161 (273)	226 (384)	300 (510)
	45°F (7.2°C)	11 (19)	16 (27)	26 (45)	43 (74)	62 (106)	80 (136)	120 (205)	173 (294)	258 (438)	353 (600)
	50°F (10°C)	12 (20)	17 (28)	28 (47)	45 (77)	65 (110)	86 (147)	130 (221)	181 (308)	297 (504)	406 (690)

(Note) In case of "Option A (Cool compressed air output)", the air flow capacity is different. Refer to page 117 for details.

Note 1) ANR is under the conditions of 68°F (20°C) at atmospheric pressure and relative humidity of 65%.

Note 2) Air flow capacity for each outlet air pressure dew point is indicated.

Note 3) The operation range does not guarantee the use with normal air flow capacity.

Note 4) When operating conditions are different from the rated specifications, please select a model in accordance with the Model Selection (Page 109).

Note 5) These values are reference values under rated conditions, and are not guaranteed. Do not use these values for the thermal set values, etc.

Note 6) Product other than the option R is not equipped with an earth leakage breaker. Please purchase an appropriate earth leakage breaker separately.

Note 7) If this equipment suffers a short-term power outage (even if it is only momentary), it may require some time before normal operation resumes, and protective mechanisms may prevent normal operation even after the power supply has been restored.

Replacement Parts

Model		IDFB3E	IDFB4E	IDFB6E	IDFB8E	IDFB11E	IDFB15E
Auto drain replacement part no. (Note 8)	Thread symbol N	AD38N-Z			AD48N-Z		
	Thread symbol Nil	AD38			AD48		

Note 8) The part number for the auto drain components without including the body part. Body part replacement is impossible.

Construction Principle (Circuit for Air/Refrigerant)

Humid, hot air coming into the air dryer will be cooled down by a cooler (heat exchanger). Water condensed at this time will be removed from the air by a drain separator (auto drain) and drained out automatically. Air separated from the water will be heated by a re-heater (heat exchanger) to obtain the dried air, which goes through to the outlet side.

IDFB□E Series

Optional Specifications 1

Refer to “How to Order” on pages 110 and 114 for optional models.

A Option symbol

Cool compressed air output IDFB3E to 11E

There is no heating of cooled, dehumidified air as it leaves the air dryer. The air flow capacity with this option is smaller than that of the standard dryer. (The external dimensions are identical with the standard product.)
 (Note) Perform thermal insulation treatment for pipings and equipment installed after the dryer to prevent the formation of condensation.

Air Flow Capacity

Model	IDFB3E	IDFB4E	IDFB6E	IDFB8E	IDFB11E
Air flow capacity (ANR)	5 SCFM (8 m³/h)	13 SCFM (23 m³/h)	17 SCFM (29 m³/h)	19 SCFM (32 m³/h)	23 SCFM (39 m³/h)

Conditions: Inlet air pressure: 100 psi (0.7 MPa), Inlet air temperature: 100°F (37.8°C),
 Outlet air temperature: 50°F (10°C), Ambient temperature: 100°F (37.8°C)

K Option symbol

Moderate pressure specification (Auto drain bowl: Metal bowl with level gauge) IDFB6E to 37E

The auto drain is changed from the standard one to one with a moderate pressure specification.
 A metal bowl with a level gauge which can confirm the water level is used for the auto drain.

Specifications

1. Maximum operating pressure: 240 psi (1.6 MPa)
2. Dimensions ... same as standard products

Replacement Parts

Model	Auto drain assembly part no.	Note
IDFB6E to 15E-11N	IDF-S0201	The AD48N-8Z-X2110 auto drain, insulator, and one-touch fitting are included.
IDFB22E, 37E-□N	AD48N-8Z-X2110	One-touch fitting (KQ2H11-35AS) is not included.
IDFB6E to 15E-11	IDF-S0086	The AD48-8-X2110 auto drain, insulator, and one-touch fitting are included.
IDFB22E, 37E-□	AD48-8-X2110	One-touch fitting (KQ2H10-02AS) is not included.

L Option symbol

With heavy duty auto drain (Suitable for moderate air pressure) IDFB55E, 75E

More thorough drain discharge can be achieved by replacing the float type auto drain (used with standard equipment) with a heavy duty auto drain (ADH4000-04).
 (The external dimensions are identical with the standard product.)

Maximum operating pressure: 240 psi (1.6 MPa)

Replacement Parts

Model	Replacement part no. (Description)	Configuration
IDFB55E, 75E	ADH-E400 (Exhaust mechanism replacement kit)	 <p>Exhaust mechanism replacement kit</p> <p>Housing (a mounted unit is used)</p>

R Option symbol

With circuit breaker IDFB4E to 75E

A circuit breaker with cover is attached to the side of the air dryer. This saves additional electrical wiring at the time of installation.

IDFB4E to 15E

Dimensions

Model	Unit: inch [mm]				
	A	B	C	D	E
IDFB4E, 6E, 8E, 11E	1.3 [32]	9.0 [230]	3.8 [97]	1.3 [34]	0.6 [15]
IDFB15E	1.7 [43]	10.2 [258]	4.0 [102]	3.2 [82]	—

IDFB22E to 75E

Dimensions

Model	Unit: inch [mm]					
	A	B	C	D	E	F
IDFB22E, 37E	4.9 [125]	2.3 [59]	2.4 [60]	1.6 [40]	1 [25]	1.8 [46]
IDFB55E, 75E	5.7 [145]	2.2 [56]	3.8 [96]	2.4 [60]	2 [50]	1.4 [36]

Breaker Capacity and Sensitivity Current

Model	Breaker capacity	Sensitivity current
IDFB4E to 37E	10 A	30 mA
IDFB55E, 75E	10 A	30 mA

Optional Specifications 2

Refer to "How to Order" on pages 110 and 114 for optional models.

S Option symbol

Power supply terminal block connection

IDFB3E-11 to 22E-11

The option allows the connection of a power cable to a terminal block. 200 V and 460 V specifications are equipped as standard.

IDFB3E_Terminal block

IDFB4E to 11E_Terminal block

IDFB15E_Terminal block

IDFB22E_Terminal block

T Option symbol

With terminal block for power supply, run & alarm signal and remote operation

IDFB4E to 75E

In addition to the terminals for the power supply, terminals for the operating signal and the error signal are also available. (No-voltage contact) Also, in case of remote control, operate it from the power supply side while the air dryer switch remains ON.

Contact capacity: 230 VAC, 4 A, 24 VDC, 5 A for operating and error signals. Minimum current value: 20 V, 5 mA (AC/DC) for operating and error signals.

Note) Please be sure to confirm the electric circuits with the drawings or instruction manual before using the output signal.

IDFB4E to 15E

Dimensions

Model	A	B	C	D
IDFB4E, 6E, 8E, 11E	1.3 [32]	9.0 [230]	2.6 [67]	7.0 [179]

IDFB22E, 37E	1 [25]	1.8 [46]	5.3 [135]	3.2 [81]
IDFB55E, 75E	2 [50]	1.4 [36]	10.6 [270]	

Unit: inch [mm]

V Option symbol

Timer type solenoid valve with auto drain (Suitable for moderate air pressure)

IDFB4E to 75E

Drainage is discharged by controlling a solenoid valve with a timer. A strainer for solenoid valve protection and stop valve are also included. (The external dimensions are identical with the standard product.)

Maximum operating pressure: 240 psi (1.6 MPa)

* The timer type solenoid valve actuates once (for 0.5 seconds) every 30 seconds.

Replacement Parts

IDFB□E Series

Specific Product Precautions 1

Be sure to read this before handling the products.

Refer to back page 50 for Safety Instructions and pages 6 to 8 for Air Preparation Equipment Precautions.

Installation

⚠ Caution

- Avoid locations where the air dryer will be in direct contact with wind and rain. (Avoid locations where relative humidity is greater than 85%.)
- Avoid exposure to direct sunlight.
- Avoid locations that contain much dust, corrosive gases, or flammable gases. Failure due to corrosion is not covered under warranty.
- Avoid locations of poor ventilation and high temperature.
- Allow ample space around the air dryer.
- Avoid locations where a dryer could draw in high temperature air that is discharged from an air compressor or other dryer.
- Avoid locations subjected to vibration.
- Avoid possible locations where the drain can freeze.
- Use the air dryer with an ambient temperature lower than 104°F (40°C).
- Avoid installation on machines for transporting, such as trucks, ships, etc.
- Avoid locations which experience sudden pressure/flow rate changes.

Drain Tube

⚠ Caution

- A polyurethane tube is attached as a drain tube for the IDFB3E to 75E. Use this tube to discharge drainage.
 - Do not use the drain tube in an upward direction. Do not bend or crush the drain tube. (The auto drain will not be activated and water will try to escape via the air outlet.)
- If it is necessary that the tube goes upwards, make sure it only goes as far as the position of the auto drain.

Power Supply

⚠ Caution

- Connect the power supply to the terminal block.
- Install a suitable circuit breaker applicable for the specific model.
- The voltage fluctuation should be maintained within $\pm 10\%$ of the rated voltage.

Note) Select a circuit breaker with a sensitivity current 30 mA. As regards rated current, refer to "Applicable circuit breaker capacity" on pages 111 and 115.

Air Piping

⚠ Caution

- Be careful to avoid an error in connecting the air piping at the compressed air inlet (IN) and outlet (OUT).
- Install by-pass piping since it is needed for maintenance.

IDFB3E

Air Piping

⚠ Caution

IDFB4E to 15E

IDFB22E, 37E

IDFB55E, 75E

- When tightening piping at the air inlet/outlet tube, the hexagonal parts of the port on the air dryer side or piping should be held firmly with a spanner or adjustable angle wrench.
- Variations in operating conditions may cause condensation to form at the surface of the outlet piping. Apply thermal insulation around the piping to prevent condensation from forming.
- Vibration resulting from the compressor should not be transmitted through air piping to the air dryer.
- Do not allow the weight of the piping to lie directly on the air dryer.
- If a metallic flexible tubing is used for the inlet/outlet air piping abnormal noise might be generated in the piping. In that case, please change it to the rigid tubing.

IDFB□E Series

Specific Product Precautions 2

Be sure to read this before handling the products.

Refer to back page 50 for Safety Instructions and pages 6 to 8 for Air Preparation Equipment Precautions.

Protection Circuit

Caution

When the air dryer is operated under the following stated conditions, a protection circuit is activated, the light turns off and operation stops.

- When the compressed air temperature is too high.
- When the compressed air flow rate is too high.
- When the ambient temperature is too high. (104°F (40°C) or higher)
- When the fluctuation of the power supply is beyond the rated voltage $\pm 10\%$.
- When the dryer is drawing in high temperature air that is discharged from an air compressor or other dryer.
- The ventilation port is obstructed by a wall or clogged with dust.

Compressor Air Delivery

Caution

Use the air compressor with an air delivery of 3.5 SCFM (6 m³/h) or larger for the IDFB3E to 75E series.

Since the auto drain of the IDFB3E to 75E series is designed in such a way that the valve remains open unless the air pressure rises to 22 psi (0.15 MPa) or higher, air will blow out from the drain discharge port when the air compressor starts up until the pressure increases. Therefore, if the air compressor has a small air delivery, the pressure may not be sufficient.

Auto Drain

Caution

The auto drain may not function properly, depending on the quality of the compressed air. Check the operation once a day.

Cleaning of Ventilation Area

Caution

Remove dust from the ventilation area once a month using a vacuum cleaner or an air blow nozzle.

Delay for Restarting

Caution

- Allow at least three minutes before restarting the dryer. If the air dryer is restarted within three minutes after being stopped, the protection circuit will be activated, operating light will turn off and the dryer will not be activated.
- The residual drainage in the air dryer may splash over the outlet when the operation is re-started, so it is recommended to install a filter on the outlet of the air dryer.

Modifying the Standard Specifications

Caution

Do not modify the standard product using any of the optional specifications once the product has been supplied to a customer. Check the specifications carefully before selecting an air dryer.

■ Refrigerant with GWP reference

Refrigerant	Global warming potential (GWP)	
	Regulation (EU) No 517/2014 (Based on the IPCC AR4)	Revised Fluorocarbons Recovery and Destruction Law (Japanese law)
R134a	1,430	1,430
R404A	3,922	3,920
R407C	1,774	1,770
R410A	2,088	2,090

Note 1) This product is hermetically sealed and contains fluorinated greenhouse gases (HFC). When this product is sold on the market in the EU after January 1, 2017, it needs to be compliant with the quota system of the F-Gas Regulation in the EU.

Note 2) See specification table for refrigerant used in the product.
